

# ***Torgqx***

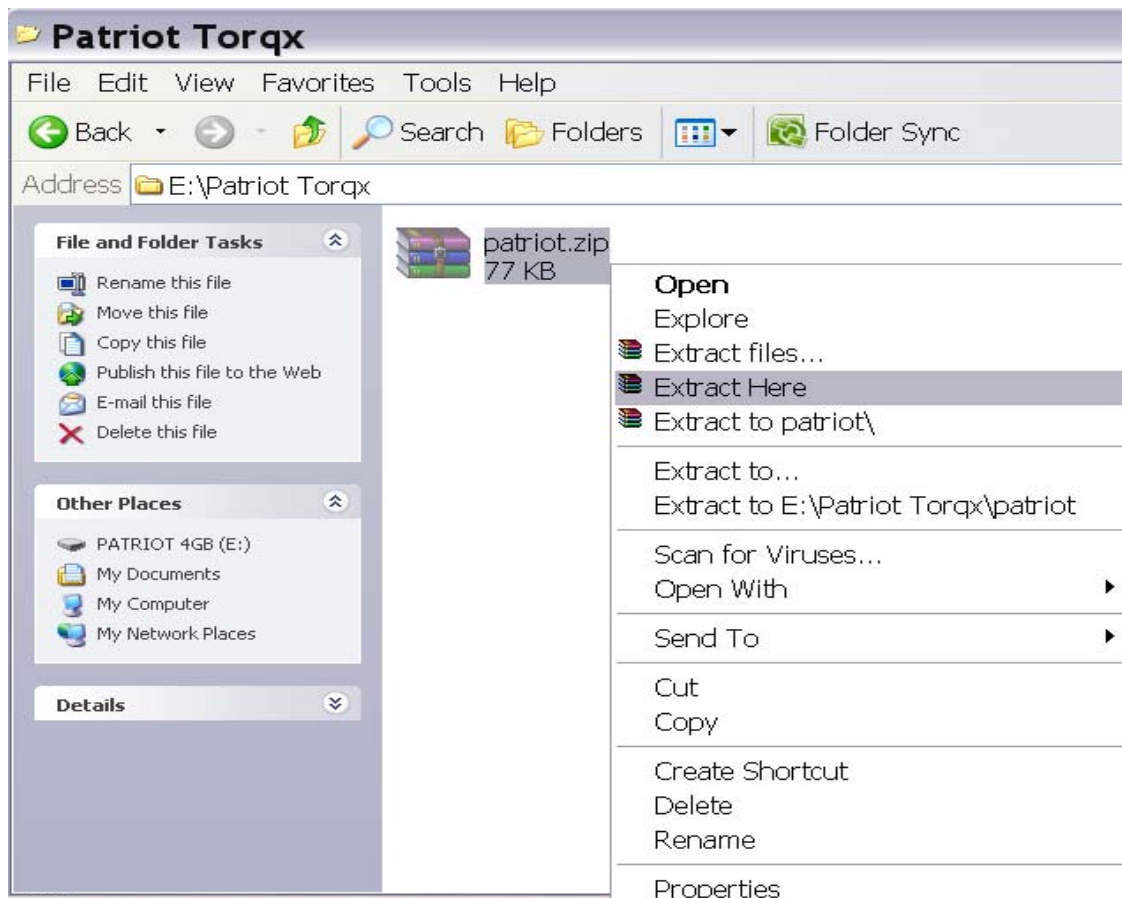

[Patriot Trim utility]

## IMPORTANT NOTES:

- a. This utility will **only** work for Patriot Torqx drives (non M28 version). Patriot Memory is not responsible for any damage to any other Patriot SSD Drive (i.e.; Patriot Torqx M28, Patriot Warp), or any other hard drive.
- b. The utility works in Windows XP, Vista® and Windows 7 only.
- c. The utility should *not* wipe out any data however it is **highly recommended** to back up data on the drive to before running the application.
- d. Make sure **not** to have the jumper (from the firmware upgrade) when running the Patriot Wiper Utility.
- e. The application should be ran in the same drive as the host O.S.
- f. The application will only apply for each partition created and not the whole drive. For example; if you have a 128GB hard drive with two 60GB partitions, you would need to run the application for each partition.

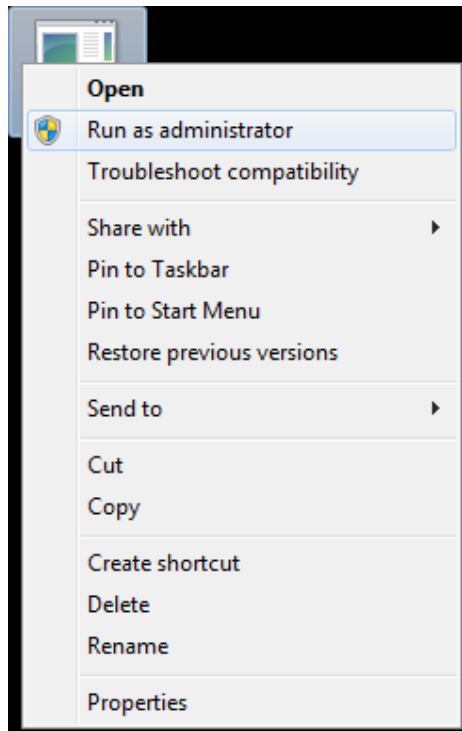

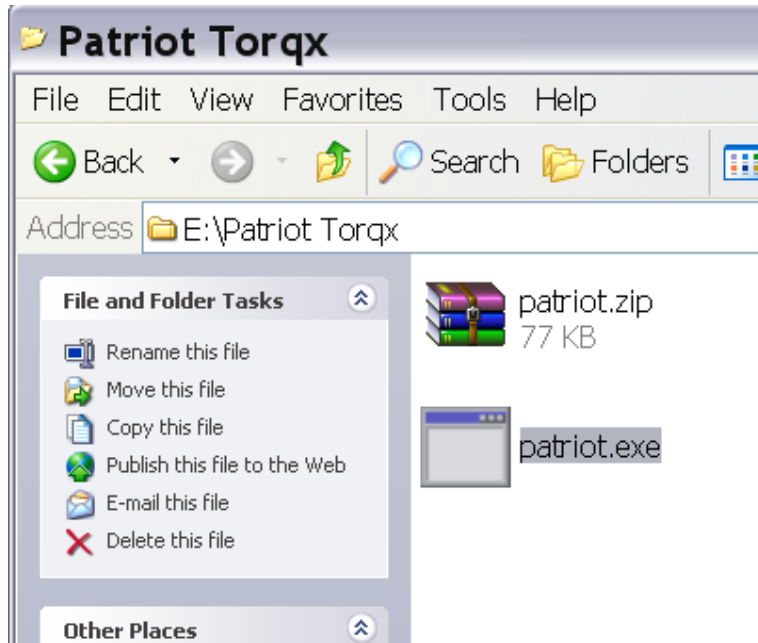

## **APPLICATION PROCEDURE FOR SATA SSD:**

**Step1.** Download and extract “Patriot.zip.”

**Step2.** Run “start.exe” and at “start” prompt screen, click “OK” to begin.

(Note: **For Vista or Windows 7** user control might need to be turned off, right click and run as administrator)

**Step3.** A warning prompt will appear, press ‘Y’ to proceed. If done correctly a ‘success prompt’ will appear indicating the utility was installed correctly.

Patriot Memory Wiper<Beta v0.3, Build date : 2009-05-25>

Patriot Memory Wiper relies on ATA PASS THRU feature to communicate with SSD.
But this feature may not be enabled by XP/2003 if SSD/HDD is smaller than 137GB.

Microsoft provides hotfix for this issue and
the hotfix can be downloaded from following URL.

http://support.microsoft.com/kb/934205

<Please use 'View and request hotfix download' link to download appropriate
language version of your operating system>

WARNING : Patriot Memory Wiper is currently BETA software.
Patriot Memory Wiper may result in user data loss, specially with some ATA device
drivers
of 64bit operating system and/or some RAID device drivers.
It is highly recommended to backup your precious data
before running Patriot Memory Wiper and Patriot Memory Wiper should be run at yo
ur own risk.
